

ONLINE ENRICHMENT SPRING CAMPS

- Candle & Scent Making Workshop
- Artificial Intelligence
- Chess Training
- Young Innovators
- Enhanced Math and English
- Science Xplorers
- Intensive English Language
- Intensive Arabic Language
- Intensive Spanish Language
- Intensive German Language
- Intensive French Language
- Intensive Korean Language
- Intensive Japanese Language
- Robotics
- Minecraft Game Design
- Technology Camp
- Mathnasium
- Virtual Drones
- Virtual Reality & Digital Art

Dates:

28th March to 1st April (Week 1)

4th April to 8th April (Week 2)

Age: 7 to 18 years old

CANDLE & SCENT MAKING WORKSHOP

By Innov8 Tech

If you want to make only natural perfumes, soaps and candles, then the scent makes all the difference in the world! Few topics in perfume, soap and candle making have engendered so much discussion, debate, and controversy over fragrance oils vs. essential oils.

We will provide you with the required equipment for in school and in Centre sessions. Online participants will receive a kit, which they will need to collect from school 2 days after the registration. The cost of the kit is included in the online course fee.

Throughout the week, you will create a variety of perfumes, candles and soaps.

Join us you know it makes Scents!

Programme Information:

Fee	AED 970, 2 hours a day/ Sunday – Thursday
Age	10 to 18 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timings	01:30 PM to 03:30 PM

Registration Link:

ARTIFICIAL INTELLIGENCE

By STEMA

Students will expand their knowledge of AI and machine learning. The topics in this course include image processing activities, along with machine learning, by programming an AI machine using Python language.

Students will get familiar with voice recognition and its real-life applications. This will enable students to explore image, text, speech, and human body recognition, natural language processing, and other functions.

Programme Information:

Fee	AED 650, 1.5 hours a day/ Sunday – Thursday
Age	6 to 13 years old
Date	Week 2 – 4 th April to 8 th April 2021
Timing	02:30 PM to 04:00 PM

Registration Link:

CHESS TRAINING

By Chess Lab Club

Statistics showed that chess is a great way to strengthen memory, enhance creativity, develop solving skills and boost the analytical abilities of children to teach children the value of planning and foresight, self-install discipline, self-confidence, perseverance, and sportsmanship. Children who study chess are also known to improve academic performance. *A child who makes great chess moves can make a great life move.*

Chess is a very old board game; it's a tool for education and skills development under the guidance of a team of internationally certified instructors. Chess Team will teach Students the fundamental of chess strategy, tactics another key concept in a fun and highly engaging way.

To maintain the delicate balance our coaches will work individually with each kid inside the group, which will take them up level further from the Beginners level to the Intermediate level.

Lesson Content:

Week 1

- Active and Passive paces
- Double attack, fork, and mating with Queen
- The pin and skewer and Mating with the Fork
- The discovered attack and eliminating the defense
- The 3 golden rule

Week 2

- Discover double check. Attacking a pinned piece
- Mate in 1, 2 (Mate through access)
- Sample Pawns endgame
- Mini plan, Pawn endgame
- Mini plan, Pawn Structure, and maneuver
- Draw learning to save difficult positions

Programme Information:

Fee	AED 600, 1.5 hours a day/ Sunday – Thursday
Age	7 to 16 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timings	09:00 AM to 10:30 AM & 03:00 PM to 04:30 PM

YOUNG INNOVATORS

By Premier Genie

This course teaches the students the complete game development cycle, and a series of guided projects to allow the students to understand the capabilities. The students developing their own creative games follow this. Students learn the core concepts of how mobile applications function and create their own, through the MIT App Inventor and similar platforms. They create numerous applications, integrating different components of the device, and work towards solving real world challenges using technology.

Learn the Python programming language, the most in demand language, starting from the basics of the crucial coding concepts, leading to creating complete computer applications, web applications etc. The course starts off with guided projects allowing the students to understand the concepts well, followed by challenges given to the students to solve real world problems.

We are offering a 3D designing course through Tinkercad and Fusion360 platform. Use your creativity to convert your ideas into reality.

Lesson Content:

- Microsoft Make Code
- Python & Scratch
- Thunkable / MIT app inventor
- Hour of code & TinkerCad

Programme Information:

Fee	AED 750, 2 hours a day/ Sunday – Thursday
Age	7 to 15 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timings	10:00 AM to 12:00 PM & 02:00 PM to 04:00 PM

Enhanced Math & English

By MetaMindz

METAMINDZ is offering cutting edge Math and English learning program using IReady, an adaptive technology capable of measuring and track progress of each child. Reading comprehension, grammar, vocabulary building will be integral part of the program. Program will be delivered by the instructor's face to face &/or Online and they will be assisted by a technology that is adaptive and driven by artificial intelligence. Students can participate in either Math or English or both the programs at the school.

Math - Raise your child's confidence and proficiency in Math's with an all-inclusive learning program designed to meet each student's specific academic needs.

- IB and UK Curriculum Mathematics for Grades 1-9 *Powered by i-Ready
- GCSE Math's Preparation *Powered by Schoolexam.ae
- ICSE and CBSE Curriculum Mathematics *Powered by Mindhour
- A-Level Math's Exam Preparation
- IB Math's Preparation

English - Develop your child's ability to read, comprehend and express themselves in English, using video conferencing sessions and digital tools facilitated by expert English language teachers.

- Discussions and debates
- Creative Writing
- Vocabulary & Grammar
- Reading Comprehension
- Writing, Understanding and Reviewing
- Figures of Speech, Story and Blogs Writing

SCIENCE XPLORERS

This March, we bring you a fantastic Spring Camp, which offers a plethora of exciting games and workshops with structured learning for younger students (6 to 11 years). For the high schoolers (12 - 17 years), we have a stimulating academic programme, which strengthens science concepts and maximizes classroom / exam performance. Exciting learning with demonstrable activities and theory to build strong STEM concepts.

Science Spies (6 to 10 years old) – Science fundamentals for juniors by using stimulating activities and exciting experiments, such as momentum with dinky cars or how plants grow by watching seeding germinate.

Biologic (11 to 17 years old) – Biologic is our way of studying Biology – simply and logically; living organisms, divided into many specialized fields that cover their morphology, physiology, anatomy, behavior, origin and distribution.

Chemistry Mystery (11 to 17 years old) – Chemistry demystified exciting experiments. We all experience Chemistry everyday whether it is breathing or baking a cake as these are all based on chemical reactions.

Computer Programming (6 to 17 years old) – Programming is now a part of almost everything around you. Your fridge has it; your tap was designed on a computer program. Your clothes tags were set up in a database. Learn Python and become a coding master in no time!

Robotics (6 to 17 years old) – We start with simple block coding and teach children how to create their own fun games. With problem-solving skills laid down, they move into the Robotics environment learning how to give life to objects.

Fantastic Physics (11 to 17 years old) – Everything around us is made of materials (what we can touch and see) it all works on the fundamentals of forces and energy (which we cannot always touch and see). Physics helps us understand ow it all links together and functions – physics is truly fantastic.

Programme Information:

Fee	AED 750, 2 hours a day/ Sunday – Thursday
Age	6 to 17 years old

INTENSIVE ENGLISH LANGUAGE

By Pomegranate Institute

Dubai is a wonderful melting pot of diverse cultures from all over the world. The city connects the East to West and has a multitude of immigrants. Non-native English speakers are the majority, which sometimes becomes a language barrier. Pomegranate Institute is the perfect place to study English courses in Dubai for anyone who would like to speak with confidence.

All our teachers are native English speakers who are TESOL and CELTA certified. At our institute, our classes are customised to suit the needs of our students with the focus on grammar and pronunciation, enhancing your work or studies abroad.

Whether your aim is to brush up your language skills, improve your English ability to reach a high IELTS score, or just study English for the fun of learning, our General English courses will help you achieve your objective. Our English courses are designed for students from all backgrounds and levels and are customised to suit your needs.

On a General English course, you will develop your language and communication skills, improve your reading, writing, listening, and speaking, whilst studying a range of topics, depending on your ability. You will also learn new grammar, vocabulary, and pronunciation.

Lesson Content:

Conversation skills

Grammar skills

Learn through games and activities

Programme Information:

Fee	AED 850, 2 hours a day/ Sunday – Thursday
Age	7 to 15 years old
Date	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timing	02:00 PM to 04:00

INTENSIVE ARABIC LANGUAGE

By Pomegranate Institute

As the official language in UAE is Arabic, many students are learning Arabic to enhance their fluency so that they can converse with native speakers. At Pomegranate Institute, we pride ourselves in providing the best Arabic classes in Dubai.

Our courses are structured to cater for every level. Spoken Arabic is the most common choice for students. The teachers integrate cultural values into the studies making the learning process interesting and enjoyable.

Lesson Content:

- Greeting and response to all greetings
- Introduce yourself and others
- Colors and Numbers
- Learn with Arabic Language videos and activities

Programme Information:

Fee	AED 850, 2 hours a day/ Sunday – Thursday
Age	7 to 15 years old
Date	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timing	02:00 PM to 04:00

INTENSIVE SPANISH LANGUAGE

By Pomegranate Institute

Did you know that Spanish is the third most spoken and second most studied language in the world? Become part of this amazing community by joining our Spanish language courses, which are customized to make your learning process engaging and interactive. Studying Spanish at our Institute not only means learning the language but enjoying the opportunity of getting to know and discovering the culture. There is no better time to learn Spanish and enrich your life.

Lesson Content:

- Greeting and response to all greetings
- Introduce yourself and others
- Colors and Numbers
- Learn with Spanish Language videos and activities

Programme Information:

Fee	AED 850, 2 hours a day/ Sunday – Thursday
Age	7 to 15 years old

INTENSIVE JAPANESE LANGUAGE

By Pomegranate Institute

Do you want to discover the Japanese culture by learning about martial arts, samurais, and the tantalizing sushi bars? At first, learning Japanese may seem like a daunting task, but if you start with the basics, you'll find that learning the language is not as difficult as it sounds. Being able to communicate with potential customers in their own language is key to winning their business. A study of Japanese can open your perspective on the values that other Asian nations share with Japan.

Lesson Content:

- Greeting and response to all greetings
- Introduce yourself and others
- Colors and Numbers
- Learn with Japanese Language videos and activities

Programme Information:

Fee	AED 850, 2 hours a day/ Sunday – Thursday
Age	7 to 15 years old

ROBOTICS

By Innov8 Tech

The new era of technology is about automation and artificial intelligence, so it definitely pays to teach these skills to children at an early age. This group course offers children the opportunity to develop life skills through hands on learning, whilst developing programming and mechanical skills.

mBot is a STEAM education robot for beginners, that makes teaching and learning robot programming simple and fun.

We will provide you with the **ROBOTICS** kit for in school and in Centre sessions. Online participants will receive a kit, which they will need to collect from school 2 days after registration. The cost of the kit is included in the online course fee.

Lesson Content:

- Build a robot from scratch and learn about a variety of robotic machinery and electronic parts.
- Get to grips with the fundamentals of block-based programming, develop logical thinking, and design skills.

Programme Information:

Fee	AED 895, 1.5 hours a day/ Sunday – Thursday
Age	8 to 15 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timing	01:30 PM to 03:00 PM

Registration Link:

MINECRAFT GAME DESIGN

By STEMA

Students will be introduced to the fun world of coding, learn principles of programming, conditional statements, loops, variables, and events, using a block-based coding environment.

They will explore programming through the Minecraft Education Edition. They will develop challenges and characters from scratch, then test and play their game with others.

Programme Information:

Fee	AED 650, 1.5 hours a day/ Sunday – Thursday
Age	7 to 10 years old
Date	Week 2 – 4th April to 8 th April 2021
Timing	1:00 PM to 2:30 PM

Registration Link:

TECHNOLOGY CAMP

By Brainy n Bright

Students will use Design Thinking methodology to Ideate-Innovate-Create solutions for solving problems. They will explore and understand the sustainable goals, research & develop appropriate solutions using technology.

Lesson Content:

Week 1

Day 1: Solve problems relating to Poverty using Coding.

Day 2: Solve problems relating to Good Health & Well-Being using App Design & Development.

Day 3: Solve problems relating to Industry, Innovation & Infrastructure using 3D Designing.

Day 4: Solve problems relating to Quality Education using Artificial Intelligence.

Day 5: Competition & Presentation

Week 2

Day 6: Solve problems relating to Climate Action using Coding.

Day 7: Solve problems relating to Zero Hunger using App Design & Development.

Day 8: Solve problems relating to Sustainable Cities & Communities using Circuit Designing.

Day 9: Solve problems relating to Affordable & Clean Energy using Artificial Intelligence.

Day 10: Competition & Presentation

Programme Information:

Fee	Online - AED 375, 1 hour a day/ Sunday – Thursday Onsite – AED 600, 1 hour a day/ Sunday – Thursday
Age	7 to 16 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timing	10:00 AM to 11:00 AM
Venue:	208, Platinum Business Center - 7 Baghdad Street - Al Nahda 2

MATHNASIUM

This Spring break, Mathnasium brings you another exciting chance to help your child get a better understanding of Math!

Remember that number sense does not develop by accident. It is the result of a process of encounter and interaction with a specific set of concepts and skills presented in a way that makes sense to the learner.

The Mathnasium Regular Hour holiday program can be utilized for 1 week (5 days) of your child's vacation. During this program, your child will be doing 1-hour class per day.

PRIMARY LEVEL STUDENTS (6 to 11 years old) throughout this program, kids will have the chance to improve their math skills and work on getting the head start for the second term of this school year. In order to cover the topics and areas your child needs to work on, we would need to do an assessment to your child. The student could work on the materials generated from their initial assessment. Numerical Fluency techniques on Addition, Subtraction and Multiplication are also available as part of Mental Math Program.

SECONDARY LEVEL STUDENTS (12 to 15 years old) throughout this program, kids will have the chance to improve their math skills and work on getting the head start for the second term of this school year. In order to cover the topics and areas your child needs to work on, we would need to do an assessment to your child. The student could work on the materials generated from their initial assessment or could work on other school topics that they need to revise or to master. Topics usually covered in the program are Pre-Algebra, Algebra, Geometry, Trigonometry, and Statistics.

Programme Information:

Fee	AED 850, 2 hours a day/ Sunday – Thursday
Age	7 to 18 years old
Dates	Week 1 – 28 th March to 1 st April 2021 Week 2 – 4 th April to 8 th April 2021
Timings	02:00 AM to 03:00 PM

VIRTUAL DRONES

By STEMA

In this course, students will learn how to control and program their virtual drones using the Python programming language. They will be introduced to the fundamentals of programming, how to make conditional statements, loops, and variables using python language.

Through this course, students will be introduced to autonomous programming and how to integrate sensor readings (like GPS, IR, and distance sensors).

Programme Information:

Fee	AED 650, 1.5 hours a day/ Sunday – Thursday
Age	9 to 13 years old
Date	Week 1 – 28 th March to 1st April 2021
Timing	1:00 PM to 2:30 PM

Registration Link:

<https://www.deltalearning.ae/online-spring-enrichment-camp>

Contact Details:

- Contact No.: 050 131 8050 ; 052 550 9676

VIRTUAL REALITY AND DIGITAL ART

By STEMA

Kids will learn how to program and design virtual reality environments with 360 - degree view. They will learn how to add 3D models, characters, and multiple scenes. They will be introduced to the fundamentals of graphic programming environments to expand their knowledge of virtual reality.

They will be able to create a different project such as:

- Ocean view
- Dream house
- Games and much more!

Programme Information:

Fee	AED 650, 1.5 hours a day/ Sunday – Thursday
Age	7 to 10 years old
Date	Week 1 – 28 th March to 1 st April 2021
Timing	2:30 PM to 4:00 PM
